

NAVEEN KUMAR M

Software Developer

📞 +91 9333444700 ✉ naveenkumarmnavi200@gmail.com 📍 Chennai, Tamil Nadu, India

PROFILE

Versatile and detail-driven developer with over 2 years of experience building full-stack web applications, automation tools, and secure desktop software. Skilled in Python, and building scalable backend systems with a focus on clean code, performance, and secure access control (2FA, IP-based authentication). Confident working across the full stack and collaborating with cross-functional teams to deliver production-ready solutions—whether it's banking automation, live PDF generation, or internal service tools.

SKILLS

Languages - Python, JavaScript, SQL

Frameworks & Tools - Flask, Django, Tkinter, Windows Forms, Windows Services, Git

Databases - PostgreSQL, SQL Server, MySQL, SQLite, LMDB, Supabase

Libraries & APIs - pandas, PyMuPDF, PyPDF2, Quill, etc.,...

Core Areas - REST APIs, OOP, Clean Code Practices, Automation, Debugging, PDF/RTF Generation, GitHub Workflow

Security & Performance - 2FA Authentication, IP-Based Access Control, Secure File Handling, LMDB Storage

Soft Skills - Clear Communication | Collaborative Mindset | Fast Learner | Practical Problem-Solving

PROFESSIONAL EXPERIENCE

CyberTunnels

Software Developer

Chennai, Tamil Nadu | September 2023 – Present

- Built secure internal tools and scalable desktop applications, primarily for the banking and finance sector.
- Developed and integrated IP-based 2FA login systems for internal platforms.
- Created automation tools for PDF/RTF generation, parsing Excel or text files into formal documents.
- Led backend development for Flask-based systems, including custom APIs and service integration.
- Refactored legacy software for improved speed, reliability, and maintainability using LMDB.
- Worked closely with QA and frontend teams to deliver clean, tested software on tight deadlines.

Highlighted Projects

- **OneView Ticketing Platform:** Flask web app with 2FA login, Quill-based comments, internal access controls, and ticket pinning features.
- **Banking Tools Suite:** Delivered over 15 utilities for generating letters, airway bills, and formal reports for clients like HDFC, AXIS, and EZGEN.
- **Android Application:** Developed a hybrid Ionic–React app with authentication, REST APIs, responsive UI, Capacitor plugins, push notifications, performance optimizations, and Android APK deployment.

Avon Global Solutions Pvt. Ltd

Junior Software Developer

Chennai, Tamil Nadu | Sept 2022 – Sept 2023

- Created internal-use desktop apps using Python for document automation and file processing.
 - Designed systems to convert data (Excel, TXT) into structured, styled PDF/RTF outputs.
 - Maintained and enhanced full-stack internal tools used for workflow automation.
 - Contributed to internal knowledge-sharing sessions and helped onboard junior team members.
-

EDUCATION

M.Sc. Mathematics

Sri Subramaniaswamy Government Arts College

Tamil Nadu | 2020 – 2022

B.Sc. Mathematics

Arts & Science Collage

Tiruttani, Tamil Nadu | 2017 – 2020

CERTIFICATIONS & TRAINING

- **Python Programming Certification**
-

ADDITIONAL PROJECTS & TOOLS

These were created independently or contributed to during employment:

- **Golang Business Card Generator** – Batch PDF tool with security layers for card design and output
- **LMDB-Integrated File Storage** – Lightweight storage solution for fast, read-heavy apps
- **Secure File Handling System** – Designed custom encryption logic for sensitive document workflows
